**NOVEMBER 2023**

### MARKING GUIDELINES/NASIENRIGLYNE

**MARKS/PUNTE: 150**

| Symbol/Kode | Explanation/Verduideliking                                                                                                                                                |
|-------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>MA</b>   | Method with accuracy/Metode met akkuraatheid                                                                                                                              |
| <b>MCA</b>  | Method with constant accuracy/Metode met volgehoue akkuraatheid                                                                                                           |
| <b>CA</b>   | Consistent accuracy/Volgehoue akkuraatheid                                                                                                                                |
| <b>A</b>    | Accuracy/Akkuraatheid                                                                                                                                                     |
| <b>C</b>    | Conversion/Herleiding                                                                                                                                                     |
| <b>S</b>    | Simplification/Vereenvoudiging                                                                                                                                            |
| <b>RT</b>   | Reading from a table/a graph/document/diagram/Lees vanaf tabel/grafiek/diagram                                                                                            |
| <b>SF</b>   | Correct substitution in a formula/Korrekte vervanging in formule                                                                                                          |
| <b>O</b>    | Opinion/Explanation/Reasoning /Opinie/Verduideliking/redenasie                                                                                                            |
| <b>P</b>    | Penalty, e.g. for no units, incorrect rounding off, etc./Penalisering bv. vir geen eenhede/verkeerde afronding, ens.                                                      |
| <b>R</b>    | Rounding off/Afronding                                                                                                                                                    |
| <b>NPR</b>  | No penalty for rounding/Geen penalisering vir afronding nie                                                                                                               |
| <b>NPU</b>  | No penalty for omitting the unit, but a wrong unit is penalised. / Geen penalisasie indien die eenheid uitgelos is nie, maar 'n verkeerde eenheid word wel gepeenaliseer. |
| <b>AO</b>   | Answer only/Slegs antwoord                                                                                                                                                |
| <b>RCA</b>  | Rounding consistent with accuracy/Afronding met volgehoue akkuraatheid                                                                                                    |

**These marking guidelines consist of 18 pages.**

***Hierdie nasienriglyne bestaan uit 18 bladsye.***

**NOTE:**

- If a candidate answers a question TWICE, only mark the FIRST attempt.
- If a candidate has crossed out (cancelled) an attempt to a question and NOT redone the solution, mark the crossed out (cancelled) version.
- Consistent accuracy (CA) applies in ALL aspects of the marking guidelines; however, it stops at the second calculation error.
- NOTE: consistent accuracy (CA) does not apply in cases of a breakdown.
- If the candidate presents any extra solution when reading from a graph, table, layout plan and map, then penalise for every extra item presented.
- As a general marking principle, if a candidate has incurred one mistake and there is evidence of sound mathematics thereafter, then that candidate should lose one mark only.
- Rounding is an independent mark.
- A conclusion mark can only be given if relevant calculations precede it.
- No penalty for rounding (NPR) if the first decimal is correct.

**LET WEL:**

- As 'n kandidaat 'n vraag TWEE KEER beantwoord, sien slegs die EERSTE poging na.
- As 'n kandidaat 'n antwoord van 'n vraag doodtrek (kanselleer) en nie oordoen nie, sien die doodgetrekte (gekanselleerde) poging na.
- Volgehoue akkuraatheid (CA) word in ALLE aspekte van die nasienriglyne toegepas, dit hou op by die tweede berekeningsfout.
- Let wel: volgehoue akkuraatheid (CA) geld nie in die geval van 'n afbreuk nie.
- Wanneer 'n kandidaat aflesings vanaf 'n grafiek, tabel, uitlegplan en kaart geneem en ekstra antwoorde gee, penaliseer vir elke ekstra item.
- 'n Algemene nasienbeginsel is dat indien 'n kandidaat een fout maak en daarna voortgaan met korrekte wiskunde, dat die kandidaat slegs een punt verloor
- Afronding tel as 'n onafhanklike punt
- 'n Gevolgtrekkingspunt kan slegs gegee word indien relevante berekeninge dit voorgaan.
- Geen penalisering vir ronding (NPR) as die eerste desimaal korrek is nie.

**NOTE: Questions marked with \* refers to the notes.**

**Questions where the numbers are encircled are the ones where we have a tolerance range.**
